## FOREWORD

In the current catastrophe of pandemic Covid-19, inevitably the world population is drawn towards herbal remedies. Regulations and guidelines for global marketing of these remedies, clinical trials, toxicity along with quality assurance and quality control have considered pressing complications in herbal manufacturing industry.

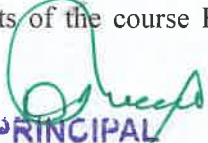

Adulteration, substitution, and a paucity of sophisticated analytical instrumentation in herbal analysis have influenced the complexity of the industrial herbal manufacturing process. Furthermore, new regulations and legislation pertaining to herbal and cosmetic product quality requirements in industry, and the substantial role played by regulatory agencies globally necessitate the understanding and implementation of regulations, quality assurance, and quality management systems.

Understanding worldwide regulations governing the development of herbal and cosmetic products, and also the rational explanation for their usage, has become significant for graduate and postgraduate students of pharmacy, health care, and related disciplines who will serve society and various industries.

The book "Herbal and Cosmetic Analysis," authored by a team of experienced and young dedicated Pharma teachers, attempts to cover all components of the course Herbal and

**PREFACE**

We are delighted to introduce Text Book of Herbal and Cosmetic Analysis to the community of pharmacy. The book was designed in accordance with PCI syllabus and guidelines. It was significant to compose a book since there was a deficit of definite and single text book for herbal and cosmetic analysis corresponding to PCI syllabus.

Post graduate students and concerned teachers are forced to execute rigorous exercise in the area of study of herbal and cosmetic analysis. The number of books accessible for preparation is limited and insufficient to address the complete syllabus expanded in five units. It also enables the students and teachers to devote a significant period of time in reviewing publications which was challenging. However students may find it complicated to gather a diverse range of sources for preparation. With this context in mind, we strove hard to structure the book in accordance with the specified curriculum.

The text covers various aspects of toxicity of herbal remedies and their regulations, comparative study of herbal drug monographs, safety monitoring of herbal medicines, WHO and AYUSH guidelines, evaluation of cosmetic products, Bureau of Indian Standards

## Index

### Unit – I Herbal remedies- Toxicity and Regulations

Herbal Medicine/Remedy	1
Herbal vs Conventional drugs	3
Efficacy of herbal medicine products	27
Validation of Herbal Therapies	36
Pharmacodynamic and Pharmacokinetic issues	42
Herbal drug standardization	46
WHO guidelines	48
AYUSH guidelines	75

### Unit – II Adulteration and Deterioration

Introduction	75
Types of adulteration/substitution of herbal drugs	77
Causes and Measure of adulteration	83
Sampling Procedures	92
Determination of Foreign Matter	97
DNA Finger printing techniques	100
Pesticide residues	111
Toxic heavy metals	126
Toxins and microbial contamination	130
Regulatory requirements for setting herbal drug industry	139
Global marketing management	140
Patents and IPR	143

### Unit – III Effect of Herbal Medicine on Clinical Laboratory Testing

Adulterant Screening using modern analytical instruments	165
Regulation and dispensing of herbal drugs	178
Stability testing of natural products	195
