### Avenues of Career development for the faculty in our institute

Faculty academic and professional development is crucial to the success of both individual faculty members and the institutions where they work. Teachers have an important role in a student's professional and personal development. A positive educational pharmacy environment is necessary for enhancing healthcare, research, and professional examinations. This process begins with the transfer from postgraduate training to professor position and continues until retirement. Our institute offers career development opportunities for faculty at all stages of their careers in their upgradation. Every kind of career path caters to a specific set of qualifications that help you perform your job.

Career development is concerned with the basic character of individuals' relationships with their jobs and employees' relationships with their organizations. A well-defined plan of action prepares personnel for the future and ensures that an organisation can fulfil both current and future needs. Faculty academic and career development will not only promote professional practices relevant to technical education but also motivates faculty to achieve competitive teaching and learning environments, thus channeling development in terms of academic qualifications and personal matters.
